CYANURIC ACID / CHLORINE STABILIZER , BOOSTER

Revision date

09/11/2006

Revision: 3

Supersedes

31/07/2003

## Identification of the substance & the company

Chemical name

Cyanuric acid

Synonym(s)

Cyanuric Acid Powder, Cyanuric Acid Granular, Isocyanuric acid, Cyanuric acid

**Chemical formula** 

C 3 H 3 N 3 O 3

**Chemical family** 

Isocyanurate

Molecular weight

129.08

Type of product and use

Chlorine stabilizer for swimming pool use.

Supplier

Clearon Corp.

95 MacCorkle Ave. SW, South Charleston, WV 25303, USA

Tel: (304) 746-3000

**Emergency Telephone** 

Chemtrec (800)424-9300

# 2. Composition / information on ingredients

Components CAS	Weight %	ACGIH-TLV Data	OSHA (PEL) Data
Cyanuric acid 108-80-5	90-99	Not determined	Not determined
SULPHURIC ACID % 7664-93-9	0-1	0.2 mg/m³,A2 (Designation refers to sulfuric acid contained in strong inorganic acid mists)	1 mg/m³
Ammelide 645-93-2	0-0.5	Not determined	Not determined
Ammeline 645-92-1	0-0.5	Not determined	Not determined

Revision: 3

#### 3. Hazards identification

**Emergency overview** 

White granules or powder

Irritant to eyes and respiratory system.

Potential Health Effects:

- Eye Contact

Contact with eyes may cause slight irritation consisting of redness, swelling and

mucous discharge to the conjunctiva.

No corneal damage or visual impairment.

- Skin contact

Skin contact may cause a mild irritation consisting of transient redness. This irritation

effect would not be expected to result in permanent damage.

- Inhalation

No significant adverse effects to health would be expected to occur from inhalation

with normal use of this product.

However, if dust is created and inhaled, inhalation may cause mild irritation to the

throat, mucous membranes and upper respiratory tract.

- Ingestion

Ingestion may cause gastrointestinal discomfort with any or all of the following

symptoms: nausea, vomiting, lethargy or diarrhea.

NFPA Ratings (Scale 0-4)

Not established

HMIS Ratings (Scale 0-4)

Health = 1, Fire = 0, Reactivity = 0.

#### First-aid measures

Eye contact

Holding the eyelids apart, flush eyes promptly with copious flowing water for at least

20 minutes. Get medical attention immediately.

Skin contact

Remove contaminated clothing. Wash skin thoroughly with mild soap and plenty of

water for at least 15 minutes. Wash clothing before re-use.

Get medical attention if irritation occurs and persists.

Inhalation

In case of dust inhalation or breathing fumes released from heated material, remove

person to fresh air.

Keep him quiet and warm. Apply artificial respiration if necessary and get medical

attention immediately.

**Product Name** 

**CYANURIC ACID** 

Product id Revision date

2011 09/11/2006 31/07/2003

Supersedes

Revision: 3

Ingestion

If swallowed, wash mouth thoroughly with plenty of water and give water to drink.

Get medical attention immediately.

NOTE: Never give an unconscious person anything to drink.

Note to physician

Treat symptomatically and supportively.

## 5. Fire - fighting measures

Flash point

Flammable/Explosion limits Auto-ignition temperature Not applicable

Not applicable Not applicable

Suitable extinguishing media

Use extinguishing media appropriate to surrounding fire conditions.

Fire fighting procedure

Cool containers with water spray. In closed stores, provide fire-fighters with self-contained breathing apparatus in positive pressure mode.

Unusual fire and explosion

hazards

When heated to decomposition, may release poisonous and corrosive fumes of CO2,

CO, NH3, NOx and cyanic acid.

#### 6. Accidental release measures

Personal precautions

See section "Exposure controls/personal protection".

Methods for cleaning up

Sweep up, place in a suitable container and hold for waste disposal. Ventilate area and wash spill site after material pickup is complete.

- Soil

Keep spill materials dry and free of all foreign matter.

Containerize in a clean, dry container.

- Water

This material is heavier than water. This material is very slightly soluble in water.

- In air

Not applicable

## 7. Handling and storage

Handling

Do not take internally.

Avoid contact with skin, eyes, and clothing.

Upon contact with skin or eyes, wash off with water.

Storage

Store in a dry, cool area Product has an indefinite shelf-life limitation. Do not store at

temperatures above 60°C/140°F.

# 8. Exposure controls / personal protection

Ventilation requirements

Use local exhaust as necessary, especially under dusty conditions.

Personal protective equipment:

- Respiratory protection

When dusty conditions are encountered, wear a NIOSH/OSHA full-face respirator with chlorine cartridges for protection againts chlorine gas and dust/mist pre-filter.

Revision: 3

- Hand protection

Neoprene gloves

- Eye protection

Chemical safety goggles

Skin and body protection

Body covering clothes and boots

Hygiene measures

Do not eat, smoke or drink where material is handled, processed or stored. Wash

hands carefully before eating or smoking

## 9. Physical and chemical properties

**Appearance** 

White granules or powder

Odor

None

Melting point/range

Sublimes @ 320-330 °C (608-626°F)

Boiling point/range

Not applicable

Vapour pressure Vapor density Not applicable under standard conditions Not applicable under standard conditions

Evaporation rate (ether=1)

Not applicable under standard conditions

Solubility:

0.27 g/100ml at 25°C

- Solubility in water

3.8-4.0

Decomposition temperature

Not applicable

#### 10. Stability and reactivity

Stability

Stable under normal conditions

Materials to avoid

Oxidizing agents

Conditions to avoid

Heating above 330°C (626°F)

Hazardous decomposition

11041119 45040 000 0 (020 1)

products

Cyanic acid, nitrogen oxides, carbon monoxide, carbon dioxide.

Hazardous polymerization

Will not occur

### 11. Toxicological information

#### Acute toxicity:

- Rat oral LD50

>5000 mg/kg

- Rabbit dermal LD50

>2000 mg/kg

**Product Name** 

CYANURIC ACID

Product id

11. Toxicological information

- Eye irritation (rabbit)

Mild irritant

- Dermal irritation (rabbit)

Mild irritant

Target organ effects

May cause mild skin and eye irritation.

Based on data from toxicological investigations, cyanuric acid does not result in

direct target damage.

Damage to the kidneys and bladder has been observed in rats when these animals are provided a saturated solution (5375 ppm) of cyanuric acid for their drinking water. During excrection of high amounts by the kidney, stones of cyanuric acid can form (calculi) resuting in mechanical damage which is secondary to stone formation. There should be no risk to humans during manufacture of the product, its use as a swimming-pool disinfectant, or even by consumption of dilute solutions (1-10 ppm) of cyanuric acid.

Revision: 3

Cyanuric acid is excreted unchanged rapidly via the kidneys. It lacks the potential to

bioaccumulate in the body.

Chronic toxicity

There are no known or reported effects from chronic exposure except for effects

similar to those experienced from single exposure.

Mutagenicity

Not known or reported to be mutagenic.

Cvanuric acid was demonstrated to be non-mutagenic in the Ames assay, both with

or whithout metabolic activation.

Carcinogenicity

Cyanuric acid is not known to be a carcinogen.

Not classified by IARC, OSHA, EPA.

Not included in NTP 11th Report on Carcinogens. Sulfuric acid is not known or

reported to be carcinogenic by any reference source.

IARC evaluated several epidemiology studies where individuals in a variety of industries had been exposed to a mixture of strong inorganic acid mists is

carcinogenic to humans.

Because cancer has not been observed in animals when they are exposed only to sulfuric acid mist, exposure to sulfuric acid by itself was not determined to be

carcinogenic to humans.

Reproductive toxicity

There are no known or reported effects on reproductive function or fetal

development.

Monosodium cyanurate (the sodium salt of cyanuric acid) has been tested by oral

Revision: 3

gavage in pregnant rats and rabbits.

No teratogenic effects were seen in the offspring of either species.

Sulfuric acid aerosol (95.7% purity) was tested in pregnant mice and rabbits exposed to the concentrations of 0, 5 and 20 mg/cubic meter by inhalation on gestational days

6-15 and 6-18, respectively.

No reproductive or developmental effects were seen in eitheir species at any of the

exposure concentrations utilized.

## 12. Ecological information

Aquatic toxicity: -96 Hour-LC50, Fish

>2,100 mg/l (Bluegill sunfish)

>2,100 mg/l (Fathead minnow)

>2,100 mg/l (Rainbow trout)

- 48 Hour-LC50, Daphnia magna

1,000 mg/l

Avian toxicity:

- Dietary LC50, Mallard duck

>10,000 ppm

- Dietary LC50, Bobwhite quail

>10,000 ppm

#### 13. Disposal considerations

Waste disposal

Observe all federal, state and local environmental regulations when disposing of this

material.
