

There is a New Water System for You.

**New Water Cyclor and Cyclor Pac - In Ground**

- In-line or off-line Cyclor • 7 lb. Cyclor Pac sold separately

**New Water Cyclor and Cyclor Pac - Above Ground**

- In-line Cyclor • 5 lb. Cyclor Pac sold separately

**KING TECHNOLOGY, INC.**

530 11th Avenue South • Hopkins, MN 55343  
952-933-6118 [www.kingtechnology.com](http://www.kingtechnology.com)

Covered by one or more of the following U.S. Patent Numbers:  
D540,906; 4,662,387; 5,076,315; 5,218,983 and other U.S.  
and Foreign Patents Pending.  
20-48-0518 553120743N

Printed on 100%  
Post-consumer  
waste paper.

**EASY-DOES-IT CHLORINE  
POOL CARE SYSTEM**

# Easy-Does-It Means Less Work For You

The New Water System is on constant watch, dispensing low levels of chlorine to control bacteria and provide sanitizing protection for your pool. Once you've determined the correct setting for your pool just set it, then forget it!

## Proven Technology

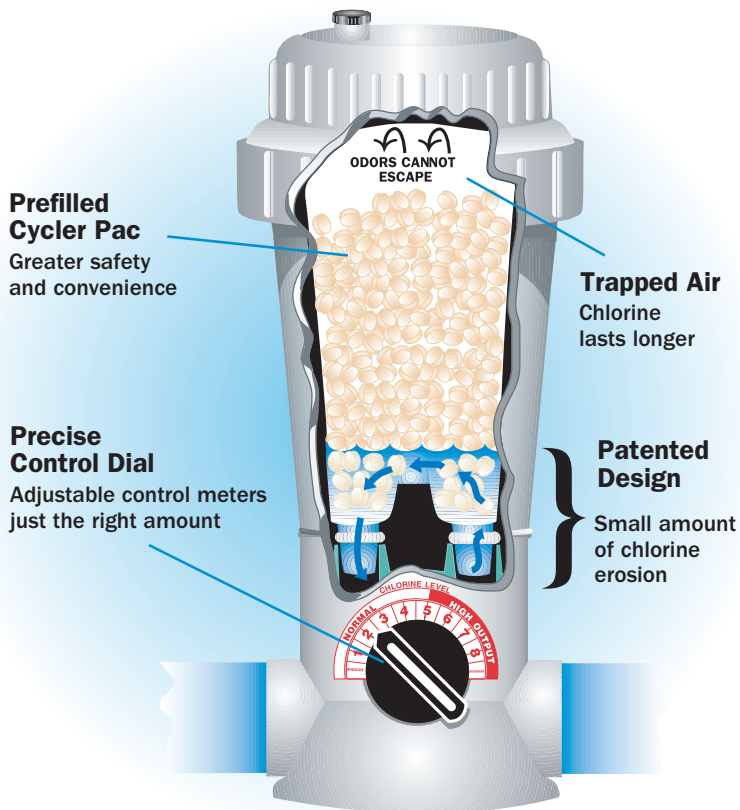

Tens of thousands are in use, and it is so revolutionary it is patented. The Cycler minimizes chlorine use by trapping air in the upper portion of the pac and reducing the erosion of chlorine into your pool to a trickle – unlike the torrent from bulk chemical systems.

## Easy-Does-It Benefits

- **Convenience:** The pre-filled Cycler Pac means no more touching or smelling chlorine.
- **Precision:** The control dial precisely meters out just the right amount of sanitation for each pool.
- **Longer Lasting:** Trapped air in the upper part of the Cycler pac keeps the chlorine dry so it lasts longer—two to three weeks on average.
- **Reliability:** Water cycles through only a small amount of chlorine for more uniform and reliable output.

## Precise Tuning Means Reduced Chlorine

The fine tuning dial on both the above ground and in ground New Water Cyclers can be adjusted for just about any variable such as pump run time, size of pool, bather load, and weather.
