

## Cell Cleaner For Salt Pools

### PRODUCT INFORMATION

#### SUPERIOR ELECTROLYTIC CHLORINE GENERATOR CELL CLEANER FOR SALT SYSTEM SWIMMING POOLS

##### BENEFITS

- ✓ Removes hard water calcium scale
- ✓ Removes oil residues
- ✓ Restores cell efficiency
- ✓ No harmful fuming
- ✓ Extends cell life
- ✓ Not harmful to metals
- ✓ Does not contain harsh acids

**SunGuard Cell Cleaner** removes most stubborn scale buildup as well as grease and common dirt from electrolytic cells. Unlike many household cleaners, this product is compatible with swimming pool water. Do not allow undiluted material to remain on porous surfaces such as masonry bricks or concrete decking for extended periods of time.

##### APPLICATION

- ✓ Turn off circulation system & remove the cell according to manufacturer's directions
- ✓ Rinse cell thoroughly with water
- ✓ Plug one end of cell with water tight plug or place in clean plastic pail
- ✓ Fill empty cell with **SunGuard Cell Cleaner** or fill pail to cover the cell
- ✓ Soak for 15-30 minutes - liquid will stop fizzing
- ✓ Rinse cell thoroughly with hose water
- ✓ Re-install the cell and re-start the circulation system
- ✓ Expended, dirty Cell Cleaner can be rinsed into sewer system with a large amount of water

##### WARNING

Irritating to eyes and mucous membranes. Harmful if swallowed.

Contains organic acid salts, sequestering agents and non-phosphate detergents. Avoid prolonged exposure to skin.

Do not take internally. Wear rubber gloves when using this product.

##### STORAGE AND DISPOSAL

Store this product in a cool, dry well-ventilated area. Keep container closed when not in use. Do not mix directly with other chemicals. Do not allow product to freeze. Discard empty container in trash.
