

**Now Scheduling
2022 Fall Pool Closings**

GOT SCALE?

You might not have scale now, but take steps to prevent its development over the winter.

Treating your pool water all year long, not just in the summer.

Many of our customers have been experiencing severe cases of scale build up on the walls of their pools over the winter months. This is because your water chemistry continues to change even if it was perfectly balanced at closing. While you may not think so, keeping your water chemically balanced over the winter is critical to protecting your investment. If the pH, alkalinity, or calcium levels are too low, it may result in irreversible etching, pitting or staining. If it is too high, scaling will occur. Salt water pools are particularly susceptible to changing Ph, even when the water is cold.

What You Can Do

- Test & Balance the Water Prior to Closing Date
- Order the Winterize Chemical Kit & Extra Qt Stain & Scale
- Request Winter Watch Service

DON'T MAKE THIS MISTAKE BEFORE CLOSING

You may be tempted to turn off your equipment, stop servicing your pool, or forget about your water chemistry prior to closing because no one is using the pool – this is a big mistake. Doing so can cause damage to your equipment and cause imperfections in your plaster. To avoid these issues, please maintain your pool until the date of closing.

- Water should be tested and balanced before closing. It is not included in the winterization. We will gladly add a winter chemical kit upon request; however, this kit does not include balancing chemicals.
- Pool should be as clean as possible. Please vacuum pool to clean leaves and debris out prior to closing to avoid possible staining of your pool surface.

2022 SERVICES

WE REQUIRE PAYMENT IN FULL UPON ORDERING FOR ALL CLOSING SERVICES. ANY ADDITIONAL CHARGES INCURRED AT THE CLOSING WILL BE BILLED SEPARATELY AND ARE DUE WITHIN 10 DAYS.

WINTERIZE POOL..... \$275.00

Includes blowing water from piping, plugging lines with rubber expansion plugs, draining equipment, and removing ladders, diving boards, and rails for indoor storage. Remove, rinse, and reinstall diatomaceous earth filter elements, bag filters, and cartridges. The water level will be lowered to 1"-2" below the tile. (Mineral cartridges will be removed and discarded for those with mineral systems). **Pool will be winterized in the condition in which it is found. Please balance pH, alkalinity, and hardness prior to service so the chemicals have a chance to circulate.**

- Additional pumps (excluding cleaner pumps) will have an extra charge of \$50 per pump to winterize (i.e. water feature, spa jet).

DISCLAIMER: Plastic jet fittings and drain covers degrade over time, and can be damaged due to their age when removed. Great Valley Pool Service is not responsible for replacements that may be necessary due to the integrity of these plastic fittings.

WINTERIZE POOL WITH SPA \$345.00

Includes all of the above plus blowing water from all spa piping and plugging lines with rubber expansion plugs.

- Additional pumps (excluding cleaner pumps) will have an extra charge of \$50 per pump to winterize (i.e. water feature, spa jet).
- \$140 extra for pools with separate spa systems
- \$85 extra for Caretaker filter systems

INSTALL POOL COVER \$165.00

If you would like us to set up your cover pump, please place the cover pump, garden hose, and extension cords by the pool, and we will be happy to install free of charge. For water bag covers, any additional water bags needed to properly secure the cover will be added to the final bill.

For anchored covers with cable assemblies:

- \$45 for assemblies less than 10ft
- \$70 for assemblies over 10ft

- \$100 for cables using waders/flotation devices
- \$115 for removal of child safety gate surrounding pool required to install cover

DISCLAIMER: If these items are not readily available by the pool, and we need to return after your winterization is complete to set them up, a \$75 service charge will apply. Great Valley Pool Service is not responsible for leaking water bags or covers that fall into the pool.

WINTER CHEMICAL KIT.....\$132.99 + tax

(For pool up to 30,000 gals.) Compatible with salt systems* Includes:

- 1/2 Gal Stain & Scale Preventative
- 1 Gal Winter Algicide
- 1 Non chlorine winter floater

* For pools with past scaling issues or salt systems, we recommend an additional quart of Stain & Scale.

SPA WINTER CHEMICAL KIT.....\$47.99 + tax

(Spas or small pools up to 7,500 gals.)

Includes:

- 1 Pint Stain & Scale Preventative
- 1 Pint Winter Algicide
- 1 Small non chlorine winter floater

SALT WATER POOLS.....\$39.00

Cleaning the cell is recommended annually at closing.

Mineral deposits often build up on the metal plates of the generator due to calcium's natural attraction to the electrically charged plates. When these deposits build up too much, it blocks the ability for electrolysis to occur. Over time, if this is not cleaned, the build up can permanently damage the coatings on the plates, leading to cell failure.

STAIN AND SCALE..... \$24.99

We recommend adding an extra quart of Stain & Scale for all salt water pools to prevent salts from coming out of solution.

2022 FALL ORDER FORM

Submit Your Order Online at
www.greatvalleypool.com

No phone orders will be accepted. We schedule fall closings on a first-come first-served basis.

WE WILL EMAIL YOU WITH YOUR CLOSING DATE ONCE YOUR ORDER HAS BEEN PROCESSED AND CONTACT YOU THE EVENING PRIOR TO YOUR SCHEDULED DATE AS TO AM OR PM ARRIVAL. WE CANNOT SCHEDULE EXACT TIMES OR DAYS PLEASE ALLOW UP TO 2 WEEKS FOR PROCESSING

TERMS AND CONDITIONS

- Electricity and water will need to be available at poolside. We will need electric at the filter to properly backwash the system.
- Do not shut down systems prior to winterization as freeze damage may occur.
- We will lower water level 1 - 2" below the tile. If you would like it lowered any further, it will be billed accordingly at \$45 per quarter hour.
- Baskets, eyeballs and spa jet fittings age with time and may break during removal. We are not responsible for this damage as their removal is required for proper winterization.**
- Certain valve handles, plugs & misc. equipment are placed in the pump pot basket for safe keeping.
- GVPS is not responsible for diving board hardware that may need to be replaced in the spring.
- Covers are secured as thoroughly as possible.

DISCLAIMER: It is normal for leaves to blow under the cover during the course of the winter. We are not responsible for leaves.

- Water should be tested & balanced a few days before closing. It is not included in standard winterization. A winter chemical kit will only be added if requested, but this kit does not balance your pool water. Spa kits are recommended for spas.

- Pool should be as clean as possible. Vacuum clean leaves out prior to closing. **NO VACUUMING WILL BE DONE AT CLOSING.** If requested, 15 minutes of leaf raking can be done prior to us putting on cover. Additional leaf raking time over 15 minutes is billed at \$39 per quarter hour. Pool covers should be available by the pool or instruct us as to the whereabouts so it can be obtained.
- Motors will remain attached unless otherwise instructed.
- Shocking or heavily chlorinating prior to winterization may result in premature cover wear. With a pool cover on and our cold water formulated winter algaecide, no chlorine is needed.
- We cannot assume responsibility for delays beyond our control.
- Cover pumps, necessary to minimize water displacement and damage to pool structure, must be poolside on closing day. A \$75 service charge will apply for a return trip.
- Additional charges assessed at closing will be billed and are payable within 10 days.
- If we have a payment on file, the additional charges will be paid automatically by the payment method stored in your account.

Great Valley Pool Service

446 Lancaster Ave. Frazer, PA 19355

CUSTOM ANCHORED SAFETY COVERS!

PROPERLY PROTECT YOUR POOL AND YOUR INVESTMENT

- **Secure** – prevents access to the pool by children and pets
- **Protective** – minimizes debris in the pool and the growth of bacteria and algae
- **Durable** – resists tears, rips, and sun damage
- **Long-lasting** – lasts up to 12 years on average, longer than tarp pool covers
- **Visually appealing**

We design covers for pools, spas, waterfalls, and even grottos!
Call us today for a free custom estimate.

AUTO COVER PUMP

\$229.99
*plus tax

To remove excess water from your safety cover, don't forget to order an Auto Cover Pump, which safeguards against melting snow and rain. These cover pumps can remove 2,100 gallons of water per hour.

WINTER WATCH SERVICE

Recommended once a month, weather permitting*.

Pools prone to scaling recommended biweekly.

**Services will be suspended once water is frozen.*

By signing up for our Winter Watch program, we can help to minimize the severity of plaster issues such as scaling, etching or pitting. We will visit your pool, and perform the following:

- Test & balance pH, alkalinity and calcium. Agitate the water to properly disperse the chemicals as needed.
- Monitor water levels and pump out water as needed.
- Check the cover pumps and GFCI switches to ensure pump is operational.
- Clean debris off covers, and inspect the garden hose.
- Inspect cover security, ie., rubber straps, springs, waterbags, anchors and replace as needed.
- Visual inspection of equipment.

END OF SEASON SALE - FREE MOTOR THROUGH NOV. 2ND* (\$800 VALUE)
